

82710.0 Finger scanner

for surface installation / Bluetooth

Product profile

The home biometrics finger scanner is a biometric sensor terminal for detection of fingerprints with a line sensor. This finger scanner has a Bluetooth interface for the smartphone app. The free smartphone app for iOS and Android makes it possible to manage users, devices and authorised persons from the smartphone. Installation in the door leaf or frame. A compatible control unit and the smartphone app are also required for operation.
