

16020 Adjustable milled in striking plate 21 mm

Milled in striking plate as center striking plate

Product profile

Milled in striking plate in stainless steel as center striking plate for latch / bolt with adjustable dummy component. For the multipoint locks of the Glutz MINT family with distance 78 mm. The striking plate is intended for rebated door designs.

Standard version

- X-Dimension (X-Mass): 5,3 mm (adjusting range 3 mm)
- Distance: 78 mm
- Width: 21 mm
- Length: 247 mm
- Depth: 23 mm
- DIN L or R
- Matt stainless steel

Important note

For milling the step milling cutter from HWS Tools® can be used:

- Series 40.100 for routers
- Series 40.150 for CNC machines

As milling jig the MUCK®-striking plate milling jig SBFL32 is recommended.

When mounting, first screw the striking plate into the frame and then tighten the dummy component.
