

82110 Administration Software

PC Access Admin Basis

Product profile

Scalable access control system with fingerprint biometry for small scale stand-alone up to large, networked applications. For use with high protection requirements, large personnel mutations or timed control of the authorisations. Application spectrum: apartment blocks, apartments, libraries, Keep-fit centres right up to large enterprises. Software for Win XP, Vista, Win7, Linux. Clearly laid out operating mask: Simple administration of persons, groups, access points, (readers) and access times. Software support for various reader systems. According to protection requirements, flexible equipping with PIN, Fingerprint or combined. Initial acquisition is child's play with integrated fingerprint enrolment and simultaneous use of the introduction of new users into the biometry. Download of data via Ethernet to access points.

Standard version

Biometric Login

User Management

Administration of persons: PIN or PIN and Fingerprint

Acquisition of person-specific features

Define validity periods and timed authorisations, also daily and special authorisations per group

Administration of access computer

Up and Downloading of template and authorisation data.
